URGENTEM

Who we are

Founded in 2016, Urgentem is the leading independent provider of transparent carbon emission data and climate risk analytics to the finance industry.

The scientific consensus that we must cut carbon emissions in half by the end of this decade (approximately 7.6% each year) amounts to nothing less than a transformation of the economy, requiring urgent focus and sustained action in every sphere: commerce, politics, and civil society.

If financial markets are to play a leadership role in the transition to a low carbon economy, then data and analytical tools that can be trusted are indispensable.

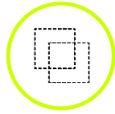

That's where we come in.

Our mission is to empower the financial sector to play a leadership role in the transition to a sustainable low carbon economy by providing climate risk data, analytical tools, investment services and products that are science aligned, transparent and collaborative.

Further to this, it is to act as an advocate for responsible investment and to promote a sustainable model for society.

URGENTEM!

Values

Transparency

Transparency informs everything we do from how we collect, process, and deliver data through to the design of our methodologies and analytics.

Collaboration

Climate change is a 'systems problem' which demands a 'systems solution.' We collaborate with leading practitioners and experts from the financial markets, climate advocacy NGOs, climate science, and academia.

Science Alignment

Our analytics are supported by our close ties with climate scientists and academics and aligned with the latest IPCC reports, EU Taxonomy and TCFD (Task Force on Climate-related Financial Disclosures) frameworks.

Competencies

Climate Risk

Experience in climate risk analytics and in-depth understanding of managing the challenges posed by the transition to a low carbon economy.

Culture

Urgentem is underpinned by its culture. Our culture, in its daily operations, is an accelerator of emotional intelligence, judgement and experience.

Finance

Strong financial expertise with background in investment management, banking & financial research.

Technology

In-depth experience across deep tech and software development for asset managers, banks and risk management.

What we do

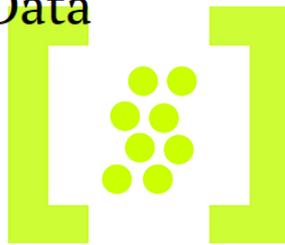

Urgentem provides three core services across the sector - independent data packages, a climate risk platform, and advisory & investment strategies. The company also is engaging with various fund managers for innovative Index Solutions. Our core target market is asset owners and asset managers, monetising by selling collated data packages, operating a license for its platform, charging on a project basis for its Advisory services and licensing data for index solutions.

Climate Platform

Our platform provides a holistic vantage point on company emissions with portfolio and company level scenario analysis and forward-looking metrics.

Data

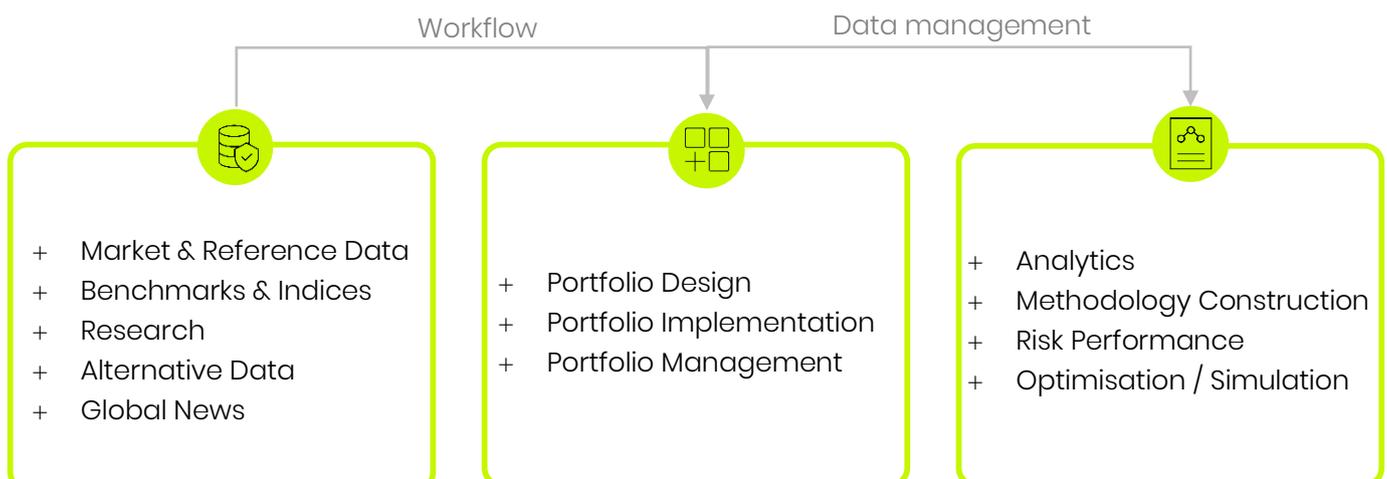

The data that we provide helps companies identify both in house and supply chain opportunities to mitigate their transition and physical risk exposure.

Advisory & Investment Strategies

Our advisory and research team enables organisations to meet their sustainable investing goals by developing a comprehensive overview of the climate-related risks and opportunities within their portfolios.

Process Overview

Clients

Urgentem works with clients across the financial industry, providing reporting and risk management solutions to the entire value chain from regulators, investment managers, and lenders, to financial intermediaries and a major central bank based in Frankfurt.

Our tools provide clients with the ability to integrate climate risk analysis and reporting into their processes and service offerings. Selected clients include:

Folksam

ILMARINEN

Partners

A multifaceted challenge like climate change requires a collaborative and multidisciplinary approach.

We have integrated IPCC and IEA scenario pathways into our toolkit, and continuously revise our data methodologies in order to align our tools with the latest climate-science and regulatory trends.

Selected partners include:

We collaborate with Carbon Tracker to incorporate energy sector asset-level data into an analytical toolkit which provides investors with a granular assessment of asset stranding in the energy sector.

right.open

We are working with right.open, a project that improves academic access to climate data and analytics across Europe, to promote multidisciplinary research on climate issues.

**EXPONENTIAL
ROADMAP**

We are a part of the Exponential Roadmap project, a consortium of corporates, NGOs, and research institutes, which is developing a strategic framework to enable businesses to transition to a 1.5C world.
